origami	bookstores	work	really	coral
from	try	wrappers	ruler	libraries

Origami is the Japanese art of paper folding. Most origami figures are of plants, animals and toys. To do origami, you need square colored paper, scissors, a ruler to work like a paper-cutting guide and a plan to follow. Bits of coral and bark can be glued onto the finished figures to add interest. Special colorful origami paper is available but candy wrappers and pages from magazines can be used. Models with directions are available from libraries and bookstores. If you admire this art, it can be really inexpensive- imagine making art out of a candy wrapper!!! But it can be really involved too if you join its own clubs or get involved with its yearly contests. Why not give it a try?

What is origami? \_\_\_\_\_

What kind of paper do you need? \_\_\_\_\_

Where can you get models to copy? \_\_\_\_\_
